

## Description

With just a single row of diodes, our 120° beam-angle freezer tubes provide extraordinary illumination and outstanding color rendering (CRI Ra83) that is perfect for all retail applications. The crisp, clean LED light helps make packaging pop in a way no fluorescent light can match. Available in a range of color temperatures from 2700K to 7000K. These tubes provide up to 130 lumens per watt for maximum energy savings, and are available in a choice of either clear or frosted lenses. These tubes are engineered for maximal heat dissipation.

## LED FREEZER TUBE LIGHTS

## Features

- External Driver
- High Efficacy: >110lm/w
- CRI Ra83
- Frosted or Clear Lens
- Aluminum alloy & PC Shell construction
- High quality material, excellent in heat dissipation
- 5-Year Warranty
- L70 Rated: 50,000 Hours
